DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 44 is rejected under 35 U.S.C. 102(e) as being anticipated by Fujishiro et al. (U.S. 6,784,657).

Fujishiro et al. disclose in Figs. 2, 4 and 5A, a pusher having a pusher block 71 via a holder used as a pressure head and attached onto the front end of the pusher body 72; a socket 141 contacting electronic device 160 of Fig. 2 (to be tested from an opposite side of socket 141 (see Fig. 2) at the time of conducting a test by pressing input/output terminals of electronic testing apparatus via object 200 (Object 200 are signal pins contact or source pins are inherent that they are input/output terminals) against socket 141; pusher block 71 having shaft 74 and 141a protruding perpendicularly from an upper surface see Figs. 4 and 5A.

Allowable Subject Matter

3. Claims 30-43 are allowed.

Art Unit: 2829

4. Claims 45-52 are objected to as being dependent upon a rejected base claim 44, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: claims 30 and 45 recite, inter alia, "two or more elastic means provided between lead pusher base and pusher block having an elastic force in the direction of pressing electronic device to be tested." The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations.

~~Note: Applicant's arguments with respect to claims 3-5 have been considered but are moot in view of the new ground(s) of rejection.~~

Conclusion

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
